Invention Title	AI based privacy protocol in smart healthcare system using IOT
Publication Number	42/2022
Publication Date	21/10/2022
Publication Type	INA
Application Number	202241058906
Application Filing Date	14/10/2022
Priority Number	
Priority Country	
Priority Date	
Field Of Invention	BIO-MEDICAL ENGINEERING
Classification (IPC)	G16H0010200000, G16H0040200000, G16H0070400000, G06Q0050220000, G16H0010600000

Inventor

Name	Address	Country
Dr P Sampath	Dean, School of Computing, CSE DEPARTMENT, Easa College of Engineering and technology, Coimbatore	India
Dr.S.SAJITHABANU	ASST.PROFESSOR , MCA, MOHAMED SATHAK ENGINEERING COLLEGE , KILAKARAI -623806	India
Mrs Mamta rani	Assistant professor, jaipur engineering college & research centre, department of electronics and communication, Jaipur - 302022	India
Mr. D Durga Prasad	Assistant Professor , ECE, Vishnu Institute of Technology, Bhimavaram , Andhra Pradesh- 534202	India
Nishi Agarwal	Assistant Professor , Electronics & Communication Engineering , Jaipur Engineering College and Research Centre, Jaipur-302022	India
DR. SUJIT TEWARI	ASSISTANT PROFESSOR , PHYSICS , KARIMGANJ COLLEGE, KARIMGANJ -788710	India
Mr.J Logeshwaran	Research Scholar, Department of Electronics and Communication Engineering, Sri Eshwar College of Engineering, Coimbatore	India
Dr. V.Kannan	Managing director, CLDC Research and Development No.997, Mettupalayam Road, Near X Cut Signal,R.S.Puram, Coimbatore 641002.	India

Abstract:

AI based privacy protocol in smart healthcare system using IOT Abstract Most people living around us approach the causes of disease from their own experience and base. So the question must arise among us, who is right about the root cause of a particular disease? Only then we can know the true causes of the disease and find preventive methods and correct it. Although many people attribute diarrhea to various causes, the most important causes of diarrhea are bacterial infections, lack of good water, or lack of proper sanitation. Before a drug is available in the pharmacy, it is investigated in clinical trials. Clinical trials are carefully monitored and scienti are documented to evaluate the safety and effectiveness of investigational drugs to find new and better treatments for patients. They are performed in a hospital or in which doctors and other health professionals observe and evaluate a volunteer's response to an investigational drug.

Complete Specification

Description:Background problem for the innovation

Generally, a medical team consists of a medical officer, a nurse, a driver, a cleaner, all of whom are involved in camps to provide necessary medical facilities to the people living in remote villages. It is a mobile hospital. Hospital discharge is the stage at which a patient leaves their current hospital to return home for continued care or is transferred to another hospital. Discharge of a patient from a hospital is based on the patient's condition and need for continued treatment or services. The patient's primary medical consultant is responsible for his or her care and determines the patient's readiness for discharge based on the referral and discharge thresholds of indications. We follow strict discharge criteria when a patient is ready to leave the hospital. Discharge planning begins shortly after admission and includes assessment of ongoing needs such as referral to a medical specialist, routine medicine, nursing care, or palliative care needs coordinated at home by the family. The patient's family is included in the discharge planning process, tailored to the patient and his or her needs. Discharging a patient from hospital or making further medical referrals include understanding their transport needs and ensuring safe transport home or to another hospital. Assessing the transportation needs of patients who require assistance is especially important.

Prepare a list of all your questions before you begin the exit process. Make sure all your questions are answered. If you do not understand English during this process, you can always ask for an interpreter or language referee. You may have a family member or friend with you during the discharge process. Apollo Hospitals always provides a comprehensive summary with an overview of your stay in the hospital.

Innovation Model

The proposed innovation model was consisting the following block diagram shown in fig 1
